THE DULIS RECYCLING BOX

We deliver a 1m³ cardboard box to your site. This is where users can dispose of their plastic waste related to Multi- Sorenson and ClearLine tips.

When the box is full, we come to retrieve it and send the collected waste **to a plastic recycling facility.**

The cardboard box arrives folded on a pallet. Unfolded, it measures 115x110x120 cm (+/- 15 cm when full).

USE YOUR OWN BOXES

2

You may also deposit waste related to your empty boxes and refill trays in the **cardboard boxes of your choice.**

When you have reached a given amount of boxes (10 at the most), we will **come and collect the whole set** to entrust the collected waste to a plastic recycling company.

Your box or your boxes must be located in an **easily accessible place** to facilitate their retrieval.

To order your box or have your full boxes picked up, scan the QR code, or find the form at the following link: <https://www.dulis.be/about/csr/environment>

For more information, send us an email at recycling@dulis.be
