

96-well PCR Detection Plates for ABI (AB-1100 series)

- ▶ For direct use in ABI 96-well sequencers without adapters and in all ABI PCR and qPCR instruments
- ▶ The white plate is suitable for quantitative PCR
- ▶ Reinforced half-skirt for a better grip by robots
- ▶ Made of virgin polypropylene
- ▶ Thin wall
- ▶ Identification cut corner
- ▶ Alphanumeric marking

Cat. No.	Description	Units/ carton	€ Excl. VAT carton
016314	Standard 96-well PCR plate, natural	25	NC -

96 Detection Mark II PCR Plates for ABI (AB-1400 series)

Same properties as the AB-1100 96-well PCR plate, but with a tray (without a rim protruding from the tray).
Compatible with all ABI instruments (2700, 9600, 9700 thermal cyclers, TaqMan 5700, 7000, 7300, 7500, 7700, 7900 quantitative PCR; ABIPRISM 310, 3100, 3700, 3730 sequencers)

- ▶ Made of virgin polypropylene
- ▶ Reinforced half-skirt for improved rigidity and robotic handling
- ▶ Alphanumeric marking available in black
- ▶ Flange around each well to eliminate the risk of cross-contamination and allow for different sealing methods
- ▶ Available with barcode for use on the ABI 3730 sequencer and ABI 7900 QPCR thermal cyclers

Description	Natural	White	Black
Moulded marking plate	016657	016659	016660
€ Excl. VAT, 25 units	NC -	NC -	NC -
Plate, black printed marking	016682	016683	-
€ Excl. VAT. 25 units	NC -	NC -	-

Versiplates 96-well flexible PCR plates

- ▶ 12 strips connected in one plate, to be used with or without the frame
- ▶ Plate can be used in its entirety or as a detachable strip
- ▶ Patented, low profile PCR microtubes
- ▶ Natural or transparent
- ▶ Seals with heat seal adhesives or films, and with Thermo cap strips
- ▶ 3 types of caps: domed, flat or for QPCR

Versicap Mat	Domed caps	Flat caps	QPCR plugs
