

Drosophila accessories (continued)

CO₂ regulators

- Connection for tubes with an internal Ø of 3.2 mm
- Radiator version specially adapted to high CO₂ flow rates, to limit the risk of the mechanism freezing

Cat.No.	Description	€ Excl. VAT
789296	1-channel CO ₂ regulator in chrome-plated copper	NC -
789300	CO ₂ regulator with radiator and flow meter	NC -

Simple version

Radiator version

Agar for drosophila

- **Standard agar**
- Used in food processing, excellent dispersion, stabilisation, thickening and gelling properties
- Used in many techniques
- Melting at 85 - 90 °C / gelling at 34 - 38 °C
- **Agar type II**
- Agar USP, basic ingredient in fly food
- Dim 100 mesh
- Batch to batch control
- Used when adding antibiotics - Moorhead agar

Food for drosophila

Tegosept

- Used as a preservative, odourless, tasteless, non-toxic
- Active at low concentration against many micro-organisms
- Synonyms: benzoic acid, p-hydroxy-, methyl ester; methyl paraben; nipagen; Lexgard M.

Cat. No.	Description	€ Excl. VAT
789063	Tegosept 1 kg	NC -
789130	Tegosept 5 kg	NC -
789131	Tegosept 25 kg	NC -

Yellow cornmeal

- Degermed
- Batch to batch quality control

Cat. No.	Description	€ Excl. VAT
789147	Yellow cornmeal 5 kg	NC -
789129	Yellow cornmeal 11.3 kg	NC -

Sodium propionate

- Safe and economical solution, good alternative to propionic acid
- Powder easily soluble in water
- Used as a preservative.

Cat. No.	Description	€ Excl. VAT
789177	Sodium propionate 1 kg	NC -

Molasses

Cat. No.	Description	€ Excl. VAT
789214	Sulphur Free Molasses 1 gallon 3,78 l	NC -

Inactive dry yeast

- Natural source of minerals and amino acids in Drosophila nutrition
- Dissolves easily in all fly food recipes

Cat. No.	Description	€ Excl. VAT
789126	Inactive dry yeast 5 kg	NC -
789195	Inactive dry yeast 10 kg	NC -
789196	Inactive dry yeast 22.68 kg	NC -

Active dry yeast

- Supplied in a 900g bag, vacuum sealed in an aluminium pouch
- Store at room temperature

Cat. No.	Description	€ Excl. VAT
789093	Active dry yeast 900 g	NC -
