

## SPL culture chambers

- Sterile
- Polystyrene chamber glued to a glass microscope slide (75 x 25 mm)
- Non-cytotoxic
- Slide available in different materials:
  - glass, naturally charged, ideal growth surface for adherent cells ;
  - DLux, modified plastic with minimal autofluorescence ;
  - FLux, modified plastic film (188 µm) for confocal microscopy
- Alphanumeric marking
- Supplied on trays suitable for use in incubators

### ➤ Recommended volume depending on the surface

Number of compartments	Culture area (cm <sup>2</sup> )	Working volume (ml)/chamber
1	9.4	2.5-5.5
2	4.55	1.2-2.5
4	2.13	0.5-1.3
8	0.98	0.2-0.6
