

## Polypropylene reagent reservoirs

- ▶ Polypropylene with a low binding surface to prevent reagents from sticking to the edges of the walls
- ▶ Suitable for repetitive reagent transfers or robotic use
- ▶ Pyramid bottom for easy reagent recovery
- ▶ 8 and 12 channel high reservoirs for the distribution of various reagents
- ▶ 96 and 384 channel reservoirs suitable for small volumes
- ▶ Possible Storage at -80 °C
- ▶ Autoclavable

Cat. No.	Channel Number	Features	Units/ carton	€ Excl. VAT/ carton
978373	8	Multicavity, high	25	NC -
978374	12	Multicavity, high	25	NC -
978375	96	One cavity, low	25	NC -
978376	384	One cavity, low	25	NC -

## Pyramid bottom reagent reservoirs - single use

Reservoirs of various sizes, specially adapted for robotic use, but also suitable for routine laboratory use.

- ▶ Made of polypropylene
- ▶ Low dead volume
- ▶ Compatible with most robots
- ▶ Pyramid-shaped bottom for excellent sample recovery
