

96 and 384 well Deepwell plates

- Ideal for long-term storage
- HTS, Compatible with most robots
- SBS format, ANSI/SLAS 1/2004
- Slightly raised well edges for easy sealing with films and mats
- Ultra-clear for good sample visualization
- Made of virgin polypropylene for good sample recovery, chemical resistance and long term storage
- Sterile version free of pyrogens
- Alphanumeric marking a-H and 1-12
- Autoclavable, stackable

Deepwell polypropylene plates with square wells

- SBS Format , compatible with automates
- Alphanumeric marking
- For sample storage at 86°C, DNA denaturation at 100°C
- Can be centrifuged at 6000 g
- Raised well edges for improved sealing
- Black plates for light sensitive samples
- Colour plates for identification
- Produced in a class 8 certified clean room
- Autoclavable
