

Bags for mixers

BagFilter sterile bags with side filter

These bags are equipped with a lateral filter allowing the collection of the solution to be analysed, free of fibres, either by pipetting with BagPipet and straw pipettes, or by simple pouring. These bags are recommended for the analysis of meat and sausage products.

Cat. No.	Description	Volume (ml)	Dimensions (mm)	Pack unit.	Units/box	€/box
140807	Filter bag BagFilter®/pouring	400	190 x 300	25	500	NC -

150391	Filter bag BagFilter® PCR pull-up/pipetting, small volumes	400	190 x 300	25	500	NC -
140804	Filter bag BagFilter®/pipetting	3500	380 x 510	10	100	NC -

BagPage sterile bags with full surface filter

These bags have a large filtration area which is particularly suitable for the preparation of thick samples, such as cheese. On the BagPage Plus model, a seam on the top of the bag makes it easy to locate the sampling compartment.

Cat. No.	Description	Volume (ml)	Dimensions (mm)	Pack unit.	Units/box	€/box
140810	Full filter bag BagPage surface	100	100 x 150	25	500	NC -
140811	Full filter bag BagPage Plus surface	400	190 x 300	25	500	NC -
140812	Full filter bag BagPage Plus surface	3500	380 x 510	10	100	NC -

Sterile bags without filter

These sterile (by irradiation) bags are used for sample preparation, transport and storage. Freezing is possible down to -80°C.

Cat. No.	Volume (ml)	Dimensions (mm)	Pack unit.	Units/box	€/box
140800	80	100 x 150	25	1500	NC -
140801	400	180 x 300	25	500	NC -
140803	3500	380 x 510	25	500	NC -
